## OPERATING THE NORTH ELEMENTARY SECTOR ABOVE FL345

HungaroControl is splitting the EASTNORTH geographically collapsed sector into EAST and NORTH elementary sectors above FL345. The goal of using the NORTH sector is to provide additional capacity and FPL submitting opportunities.

This change will provide an appropriate solution for the affected traffic flows, enabling them to avoid the popular and often overloaded EAST sector. This new measure will be applied starting from the 15th of May, 2025.
