Cross-border Free Route Airspace operation between ANSP of Croatia and Hungary

Cross-border Free Route Airspace operation will commence between Croatia and Hungary by the 16th of April 2026 (AIRAC AMDT 003/2026), with opening the free route interface between SEE FRA and SECSI FRA on the common LDZO and LHCC FIR boundary.

We encourage all aircraft operators and Computerised Flight Plan Service Providers (CFSPs) to update their flight planning software databases in time, in order to utilize the available new routing options.
